Organizational driver offering product development, product improvement, pioneering technologies, process designing and engineering of scalable applications. Strong analytical abilities with excellent articulation and problem solving skills.

Technical Skills:

Technologies	JavaScript, TypeScript, JSON, HTML, Bootstrap, C#, Python
Deployments	Docker, Kubernetes, Azure, Micro-services
SCM	GIT, SVN, BitBucket, Harbor
CI/CD Toolset	Jenkins, Rancher, Kubernetes, Docker, Azure DevOps
Database	MongoDB, MySQL, CouchDB
Web Servers	NGINX, IIS Express
Frameworks	NodeJS, ExpressJS, Angular, DotNet Core
Cloud Providers	Azure, AWS
Agile	JIRA

Project Experience:

Project Title:	DevOps Command Centre	Duration: 14+ Months
Role/Responsibility	Full Stack Developer	
Project Summary	Developed and worked on creating configuration and deployment management portal targeting endpoints such as Linux, Windows and Docker. Developed using mean stack with the complete application, back-end and database running in a Kubernetes cluster to provide scalability and high availability. Maintained uptime of 95%, monitored using Grafana.	
Client/Location	Unisys/Bangalore	
Platform/Technology	Angular 6, NodeJS 10, ExpressJS, MongoDB, NGINX	
Architecture	Highly Available, Multi Node	
Deployment	On Prem VMWare VMs, Kubernetes cluster	

Project Title:	Product Information Centre	Duration: 6+ Months
Role/Responsibility	Full Stack Developer	
Project Summary	Worked on the design and architecture of a modern, customer facing product information centre supporting documents and files of various formats. Designing the flow of the application. Microservices Architecture designing. Metric collection using Grafana.	
Client/Location	Unisys/Bangalore	
Platform/Technology	Angular 7, NodeJS 10, ExpressJS, ElasticSearch, NGINX	
Architecture	Highly Available, Multi Node, Container Based	
Deployment	Kubernetes cluster	

Project Title:	Product Release Record (PRR)	Duration: 6+ Months
Role/Responsibility	Full Stack Developer	
Project Summary	Automates Product release process, It replaces the existing document-based product release artifacts and their approval process, It is a product that seamlessly integrates all information in one place, processes all the approvals and release artifacts in an efficient way.	
Client/Location	Unisys/Bangalore	
Platform/Technology	Angular 7, NodeJS 10, ExpressJS, NGINX	
Architecture	Highly Available, Multi Node, Container Based	
Deployment	Kubernetes cluster	

Education:

2012-2016	Bachelor of Engineering (B.E.)	Chitkara University, Punjab	8.03 CGPA
2012	XII	Modern Senior Secondary School, Patiala	68.4%
2010	X	Modern Senior Secondary School, Patiala	82.2%

Professional Experience:

- Currently working as Systems Engineer, Application Developer, DevOps at Unisys, Bangalore from June 2016 till present.
